EDUCATION

Boston University Master's of Science (M.S) - Computer Science • Coursework: Software Engineering, Agile, Data Visualization and Analytics, Database Management, Project Management.	Boston, MA Dec 2023
Anna University Bachelor's of Technology (B.Tech) - Information Technology • Coursework: Data Structures, OS, Machine Learning, Computer Networks, Statistics, Algorithms, Cloud Computing.	Chennai, India Aug 2017 - Jul 2021

WORK EXPERIENCE

Stealth Startup (PosterosAI) <i>Software Engineer</i> • First employee and founding team member —Developed and deployed Java Spring Boot microservices for calendar sync, voice insights, and real-time user analytics. • Built secure Oracle Apex integration with GraphAPI using OAuth 2.0; enabled calendar/mail sync for centralized access. • Orchestrated GenAI platform: built a WebSocket broker that spins up task-specific LLM assistants (OpenAI, Gemini, Claude) with live model-switching; cut response latency 15× vs. legacy REST calls. • Replaced legacy PL/SQL functions with efficient inline JavaScript MLE functions and developed numerous APIs.	Boston, MA Sep 2024 - Present
---	---

YourPassion1st <i>Technology Consultant (Volunteer)</i> • Led development of a React Native + TypeScript mentoring platform for 3K+ users; implemented Tailwind UI components and integrated API gateways with Java Backend. • Applied Agile methodologies to manage releases and reduce cycle times using Git workflows and GitHub CI lint/test stages.	Chicago, IL Mar 2024 - Present
--	--

Extreme Networks <i>Software Engineering Intern (Runner-up - Best Intern Award)</i> • Automated regression triage with a Flask + Python async service—shrunk test re-queue time from 2 hrs → 15 min. • Collaborated with senior engineers to reproduce and diagnose customer issues by simulating network failures in lab setups with switches, routers, and traffic generators.	Cary, NC May 2023 - Aug 2023
--	--

Pinnacle Solutions <i>Software Engineer</i> • Built and maintained Spring Boot APIs for an e-commerce portal backed by MySQL, deployed on AWS (S3, ECS). • Designed responsive web pages using HTML, CSS, Tailwind, and Material UI; ensured cross-browser compliance. • Authored unit tests using JUnit and enforced secure code practices using internal SAST tools.	Chennai, India Jan 2021 - Jun 2022
---	--

PROJECTS

Mentor Connect [React-Native, Java, gRPC/Ocelot, AKS, Docker, GitHub Actions] • Developed full-stack job posting and chat marketplace; integrated Spring Boot backend services with MongoDB. • Managed OAuth 2.0 login flows, implemented secure session handling, and deployed using Jenkins + GitHub Actions.	May 2024 - Present
LLM integrations [Python, Javascript, SQL, LiteLLM, OpenAI, Websockets, WRTC] • Unified multi-vendor LLM access by building a LiteLLM gateway that hot-swaps Anthropic, OpenAI, Grok, and Gemini models at runtime; trimmed average inference latency 4 × and lets Product A/B-test prompts without redeloys. • Re-engineered streaming layer with OpenAI Realtime WebSockets + WRTC, cutting first-token time 6 ×.	Dec 2024 - Present
GraphAPI Integration with Oracle Apex [Oracle Apex, PL/SQL, Javascript MLE, GraphAPI, Azure] • Registered app in Azure portal and built a secure integration pipeline for O365 applications with OAuth 2.0 protocol. • Created Oracle PL/SQL + REST layer to sync calendar/mail data from Microsoft Graph.	Nov 2024 - Dec 2024

SKILLS & CERTIFICATIONS

• Programming Languages: Java (Spring Boot, JPA), Python, JavaScript/TypeScript, C++, HTML/CSS, PL/SQL, R.
• Front End: React.js, React Native, Tailwind CSS, Material UI, Astro.
• Back End & APIs: Spring Boot, gRPC, REST, Node.js (Express), Flask, WebSockets.
• Testing & Security: JUnit, Mockito, Spring MockMvc, Snyk, OAuth 2.0, OpenID Connect.
• GenAI / ML: OpenAI, LiteLLM router, RAG, prompt design, streaming via WRTC, OpenAI WebSockets, Scikit-learn, PyTorch.
• Data & Cloud: MySQL, MongoDB, PostgreSQL, Oracle.
• DevOps / CI-CD: GitHub Actions, Jenkins, Docker, AWS (S3, ECS), Azure (AKS), Git.
• Cloud & Monitoring: AWS CloudWatch, Splunk, Git, Agile, Scrum.
