EDUCATION

Boston University Master's of Science (M.S) - Computer Science • Coursework: Software Engineering, Agile, Data Visualization and Analytics, Database Management, IT Project Management.	Boston, MA Dec 2023
Anna University Bachelor's of Technology (B.Tech) - Information Technology • Coursework: Data Structures, OS, Machine Learning, Computer Networks, Statistics, Probability, Deep Learning.	Chennai, India Aug 2017 - Jul 2021

WORK EXPERIENCE

Stealth Startup (PosterosAI) <i>Founding Data Analyst</i> • First employee and founding team member —Acted as strategic analytics partner to CTO and leadership team, enabling rapid decision-making in a \$5B pharma CRM market.. • Conducted segmentation analysis and macro-trend modeling to inform product-market strategies and revenue targeting. • Designed portfolio-level dashboards (Power BI → React.js migration) to benchmark customer behavior and performance KPIs, aiding board-level reporting. • Replaced PL/SQL workflows with optimized Python + SQL solutions, reducing data processing times by 30% and enabling more timely financial forecasting. • Created financial monitoring dashboards to improve budget accuracy and detect performance anomalies.	Boston, MA Sep 2024 - Present
YourPassion1st <i>Lead Technology Consultant (Volunteer)</i> • Led strategic planning for a youth-focused nonprofit; translated stakeholder needs into measurable tech initiatives. • Engineered Python/Spark ETL pipelines across Salesforce, Trello, and local databases (Glue, S3), cutting latency by 50%. • Advised leadership on tech investment decisions through tailored data insights and forecasting models.	Chicago, IL Mar 2024 - Present
Extreme Networks <i>Software Engineering Intern (Runner-up - Best Intern Award)</i> • Engineered ETL pipelines and built a Flask dashboard to visualize processed data, cutting manual processing time by 90%. • Elevated regression workflows by developing a Python-based solution, automating identification and re-queuing of jobs. • Collaborated with cross-functional teams to troubleshoot and provide workaround for production issues.	Cary, NC May 2023 - Aug 2023
Solarillion Foundation <i>Research Assistant</i> • Researched, presented, and published 3 breakthrough Python ML solutions recognized at leading IEEE conferences. • Conducted advanced analytics; used t-tests, SVMs, and time series models to detect behavioral or health anomalies.	Chennai, India Jun 2019 - Aug 2022

PROJECTS

AML Insights Pipeline: Statistical Analysis of Transactional Behavior [Python, SQL, Plotly, Streamlit, t-test] • Modeled consumer transaction behavior using public and synthetic data to detect anomalies, benchmarked against industry norms, and delivered insights via Streamlit dashboards for executive reporting and fraud prioritization.	Jan 2024 - Present
Real-Time Insights Engine – GenAI & Portfolio Monitoring [Python, SQL, OpenAI] • Developed a scalable portfolio monitoring platform integrating LLM-driven assistants and custom analytics layers; empowered business leaders with 4x faster access to strategic insights and anomaly detection.	Dec 2024 - Present
Consumer Device Telemetry Pipeline [Python, Kafka, Dash, Docker, ETL] • Built a real-time visualization and alerting system for IoT device performance using Kafka, Dash, and Docker, enabling proactive issue detection and reducing downtime and data loss across 20% of monitored endpoints.	Jun 2024 - Jul 2024

SKILLS & CERTIFICATIONS

- **Programming Languages:** Python, JavaScript, C++, PL/SQL, R.
- **Certifications:** Microsoft Data Visualization Professional, Tableau Business Intelligence Analyst Professional Certificate.
- **Cloud & Infra:** AWS (S3, Glue, Redshift), Azure, Docker, Kafka, GitHub.
- **Methodologies:** A/B Testing, Forecasting, Time Series, t-tests, Regression Analysis, ETL, CI/CD.
- **Analytics:** Power BI, Tableau, Excel (Advanced), Streamlit, Seaborn, Pandas, NumPy, DASH, Matplotlib.
